

RoHol[®]
The Austrian Wood Composer

Wall design with **WoW effect**

www.rohol.at

**SIMPLY PRACTICAL -
SIMPLY STYLISH -
SIMPLY WOW.**

WoW, which, by the way, stands for **Wood on walls**, is RoHol's innovative and customizable design system for interior walls.

The planks of raw natural wood are resource-friendly, easy to handle and the top-quality processing produces a surface which is warm and appealing and integrates perfectly into timeless interior designs.

PRACTICAL FORMATS WITH CONTEMPORARY DESIGNS.

WoW suits contemporary interior design down to the ground.

It's not merely the format but also the diversity within the WoW line that really meets the needs of the modern interior design spirit and definitely takes care of providing you your own personal **WoW effect** at home!!

PRODUCT-DIVERSITY

WoW is definitely an interior-design eye-catcher, but that's not all! WoW also makes a great impression with its natural authenticity, its sustainability and of course, its timeless designs.

| | |
|-----------------------------|--|

Sustaining a clear conscience!

Rest assured - the whole WoW line is produced using timber from sustainably-managed forests. The PEFC™ certificate not only indicates the use of sustainable forestry but furthermore, it guarantees that the natural habitats for local flora and fauna are conserved and preserved; for you, for us and for the future!

Made by Austria!

Our products are produced and refined in Austria. Naturally, this guarantees you that your WoW panels will consistently be of high-quality but it also ensures the provision of many job opportunities locally.

Social responsibility - we are stronger together!

We take our social responsibilities very seriously and are not only the largest and most important job-provider in the region but we also continue to support projects like those at "Schloss Klaus" which help to support people with disabilities and integrate them into a meaningful daily routine. Our WoW panels are partly assembled and packed by employees with disabilities of DiG Tagesheimstätte. Because, only when working together can we be strong in the long-term!

PRETTY SIMPLE INSTALLATION!

Installing WoW is pretty simple and here is how: Each WoW panel comes ready to mount with a **doublesided adhesive strip** already attached. The only other thing required for the successful installation of WoW is an even, clear and dry surface.

When fitting WoW Panels overhead or on more problematic surfaces, we would recommend the additional use of a customary high-strength construction adhesive.

WHAT'S MORE:

WoW can be mounted **vertically and diagonally** as well as horizontally.

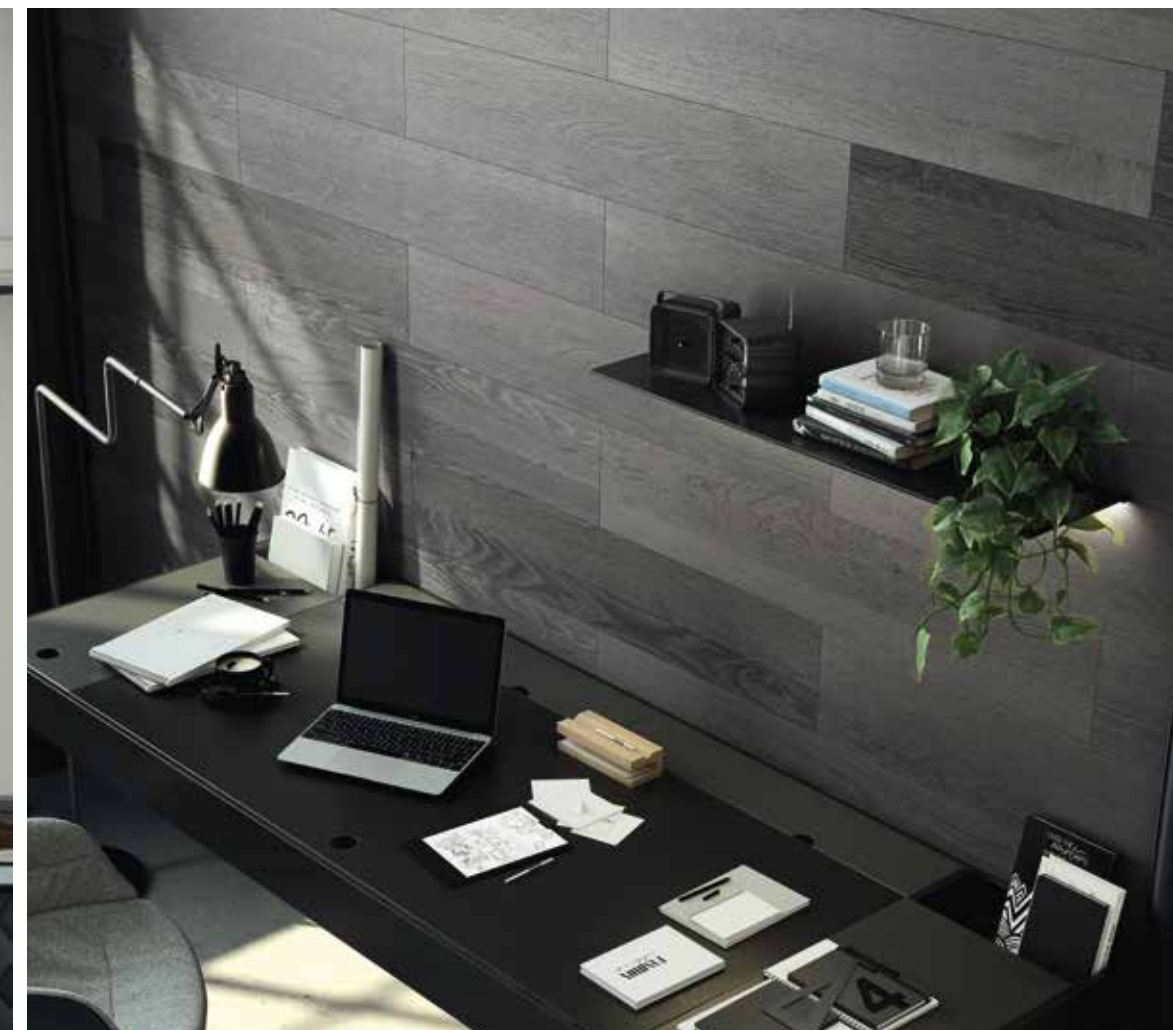

TOOLS REQUIRED:

A cross-cut saw, mitre saw or jigsaw, a spirit level, pencil and that's about it! We have a brief video demonstration showing how to install WoW. You can find a more detailed description in our WoW Assembly Instructions.
